Physical Activity

The following questions are about exercise, recreation, or physical activities other than your child's school or work activities.

D1. During the past month, did your child participate in any physical activities or exercises such as running, aerobics, golf, gardening, bicycling, swimming, wheelchair basketball, or walking for exercise?

- No
 Yes

We are interested in three types of physical activity: vigorous, moderate, and light.

- Vigorous activities cause large increases in breathing or heart rate.
- Moderate activities cause small increases in breathing or heart rate.
- Light activities cause no increase in breathing or heart rate.

D2. Now thinking about the vigorous physical activities your child does in a usual week, does your child do vigorous activities for at least 10 minutes at a time, such as running, aerobics, wheelchair basketball, heavy yard work, or anything else that causes large increases in breathing or heart rate?

No → **Go to Question D3.**

Yes ↓

D2a. How many days per week does your child do these vigorous activities for at least 10 minutes at a time?

days per week

D2b. On days when your child does vigorous activities for at least 10 minutes at a time, how much total time per day does your child spend doing these activities?

minutes per day

D3. Now thinking about moderate physical activities your child does in a usual week, does your child do moderate activities for at least 10 minutes at a time, such as brisk walking, bicycling, gardening, manual operation of a wheelchair, or anything else that causes small increases in breathing or heart rate?

No → **Go to Question D4.**

Yes ↓

D3a. How many days per week does your child do these moderate activities for at least 10 minutes at a time?

days per week

D3b. On days when your child does moderate activities for at least 10 minutes at a time, how much total time per day does your child spend doing these activities?

minutes per day

D4. Now thinking about light physical activities your child does in a usual week, does your child do light activities for at least 10 minutes at a time, such as a slow casual walk, or anything else that does not cause an increase in your child's breathing or heart rate?

No → **Go to Question D5, next page.**

Yes ↓

D4a. How many days per week does your child do these light activities for at least 10 minutes at a time?

days per week

D4b. On days when your child does light activities for at least 10 minutes at a time, how much total time per day does your child spend doing these activities?

- 6 days
- 7 days

D8. How much time does your child spend doing vigorous-intensity activities at work on a typical day?

hours minutes

D9. Does your child's work involve moderate-intensity activity that causes small increases in breathing or heart rate such as brisk walking or carrying light loads for at least 10 minutes continually?

- No → Go to Question D12.
- Yes

D10. In a typical week, on how many days does your child do moderate-intensity activities as part of his/her work?

- 1 day
- 2 days
- 3 days
- 4 days
- 5 days
- 6 days
- 7 days

D11. How much time does your child spend doing moderate-intensity activities at work on a typical day?

hours minutes

D12. The next questions exclude the physical activities at work that you already mentioned and asks about the usual way your child travels to and from school, for shopping, or to work. In a typical week does your child walk or use a bicycle for at least 10 minutes continuously to get to and from places?

D14. How much time does your child spend walking or bicycling for travel on a typical day? Think about a typical day when your child walks or bicycles for travel.

hours minutes

D15. The next questions exclude the work and transport activities that you already mentioned and ask about sports, fitness, and recreational activities. In a typical week does your child do any vigorous-intensity sports, fitness, or recreational activities that cause large increases in breathing or heart rate, such as running or basketball for at least 10 minutes continuously?

- No **→ Go to Question D18.**
- Yes

D16. In a typical week, on how many days does your child do vigorous-intensity sports, fitness or recreational activities? Vigorous-intensity activity causes large increases in breathing or heart rate and is done for at least 10 minutes continuously.

- 1 day
- 2 days
- 3 days
- 4 days
- 5 days
- 6 days
- 7 days

D17. How much time does your child spend doing vigorous-intensity sports, fitness or recreational activities on a typical day?

hours minutes

D18. In a typical week does your child do any moderate-intensity sports, fitness, or recreational activities that cause a small increase in breathing or heart rate such as brisk walking, bicycling, swimming, or volleyball for at least 10 minutes continuously?

- No **→ Go to Question D21.**
- Yes

D19. In a typical week, on how many days does your child do moderate-intensity sports, fitness or recreational activities? Moderate-intensity sports, fitness or recreational activities cause small increases in breathing or heart rate and is done for at least 10 minutes continuously.

- 1 day
- 2 days
- 3 days
- 4 days
- 5 days
- 6 days
- 7 days
